

兔抗 TGFB1 多克隆抗体

- 中文名称：兔抗 TGFB1 多克隆抗体
- 英文名称：Anti-TGFB1 rabbit polyclonal antibody
- 别名：CED; LAP; DPD1; TGFB; TGFbeta
- 相关类别：一抗
- 储存：冷冻（-20℃）
- 抗原：TGFB1
- 宿主：Rabbit
- 反应种属：Human, Mouse, Rat
- 标记物：Unconjugate
- 克隆类型：Unconjugate

技术规格

Background:	This gene encodes a member of the transforming growth factor beta (TGFB) family of cytokines, which are multifunctional peptides that regulate proliferation, differentiation, adhesion, migration, and other functions in many cell types. Many cells have TGFB receptors, and the protein positively and negatively regulates many other growth factors. The secreted protein is cleaved into a latency-associated peptide (LAP) and a mature TGFB1 peptide, and is found in either a latent form composed of a TGFB1 homodimer, a LAP homodimer, and a latent TGF B1-binding protein, or in an active form composed of a TGFB1 homodimer.
Applications:	ELISA, WB
Name of antibody:	TGFB1
Immunogen:	Synthetic peptide of human TGFB1

Full name:	transforming growth factor, beta 1
Synonyms :	CED; LAP; DPD1; TGFB; TGFbeta
SwissProt:	P01137
ELISA Recommended dilution:	5000-10000
IHC Recommend dilution:	0
WB Predicted band size:	44 kDa
WB Positive control:	Mouse brain tissue
WB Recommended dilution:	200-1000
